

IJCAI-ECAI Call for Submissions and Participation

AUGUST 15-17, 2026 · BREMEN, GERMANY

Safe Agentic AI Framework and Ecosystem Roadmapping (SAFER)

The **SAFER Workshop** — As AI models increase in capability, agency and autonomy, their impact on individuals and society grows. This interdisciplinary workshop aims to attract researchers, practitioners, policy makers and students from diverse fields including computer science, sociology, philosophy, and law to collaboratively create a roadmap considering the scientific and technical, security, economic, environmental, regulatory, social and ethical implications of Agentic AI to advance responsible if not beneficent agents and their enabling ecosystem. This interactive workshop will include a mix of invited and submitted papers and is designed to foster the interdisciplinary dialogue that is highly valued at **IJCAI-ECAI** and essential to advance progress responsibly. This global topic is timely, interdisciplinary, and necessary, addressing a critical need in the AI community and society at large.

Who Should Attend?

Academic Researchers

Computer scientists, ethicists, sociologists, and legal scholars.

Industry Practitioners

AI engineers, product managers, and data scientists building real-world applications.

Policymakers & Regulators

Officials and organizations focused on AI governance and safety.

Students

Graduate and undergraduate students exploring the social and ethical dimensions of AI.

Submissions

Join the Conversation

Evaluation criteria

Submissions are evaluated on novelty, originality, technical correctness, clarity, significance, and potential impact.

Submit At

chairingtool.com/conferences/safer2026/main-track

Workshop Site

github.com/mtmaybury/SafeAgents

Workshop Themes

Ethical Foundations & Governance

Ethical frameworks, law, regulation, policy, and philosophical debates around agent consciousness, rights, and responsibilities.

Accuracy, Bias, Fairness & Transparency

Detecting and mitigating bias and hallucination, improving agent self-awareness, and creating interpretable models.

Human-Agent Collaboration & Trust

Trustworthy interfaces, decision support risks, governance frameworks, and strategies for building public trust.

Real-World Applications & Case Studies

Responsible deployment across healthcare, finance, defense, logistics, energy, agriculture, and creative fields.

Organizing Committee

Dr. Mark Maybury

VP, Lockheed Martin; Board Director, Advanced Cyber Security Center (*Chair*)

Prof. Wolfgang Wahlster

Founding Director & CEA, DFKI

Ms. Josephine Liu

Chair, APAC Tech Policy Committee, Association for Computing Machinery (ACM)

Dr. Francesca Rossi

IBM Fellow, Global Leader for Responsible AI & AI Governance, IBM T.J. Watson Research Center

Dr. Mihai Christodorescu

Research Scientist, Security & Privacy, Google

Key Deadlines
